

This timeless classic blends European style with exquisite aluminum components to deliver a superior lighting concept. With a suite of ceiling and wall-mount luminaires featuring a variety of reflector and shielding options, Groove™ sets the mood for any environment. Combining versatility with performance, Groove establishes new standards in high quality luminaire design. Furthermore, Focal Point's conviction to the Art of Light™ is exemplified in the integrated design of a metal braided power/suspension cord and stepped canopy. The result: a functional, stylized extension to Groove's main components.

Groove gives you the versatility to adorn any interior environment. The fully adjustable pendant version lets you suspend Groove at any height requirement. Once installed, the fully adjustable wall-mount version gives you the flexibility to direct the luminaire 340° horizontally and 90° vertically. Focal Point captures the natural beauty and quality of spun aluminum by delicately brushing and anodizing all metal components, while the inside of the aluminum reflectors undergo a three-step process that controls glare and delivers a harmonious lighting effect. In addition, Groove offers acrylic reflector (white, clear or metalized) and diffusion disk options for even more application possibilities. Visit www.focalpointlights.com for more details.

Metal braided power/ suspension cord and integrated stepped canopy

Optional conical lens with metal clamp band available on profile G

Frosted white or green diffusion disk available on profiles B, D, E, F and G
