

FOCAL POINT®

Bringing It All To Light®

# SEEM® 1 ACOUSTIC LOUVER

with ID+ Technology

# THE QUIETEST LUMINAIRE JUST GOT QUIETER

Bringing acoustical and visual comfort to serene spaces, Seem® 1 Acoustic is now enhanced with tranquil continuous louvered optics.

Using the same louver cells with ID+™ Technology as the Seem 1 Louver companion, the acoustic version offers a variety of optics and delivers broad, ambient lighting or highly focused, task lighting, while also marrying the various louver finishes with an extensive PET felt color palette to achieve stunning creations.

NATURAL LINEN

# COLORS AND OPTICS TRANSFORM INTERIORS

Setting the right mood for each environment is made easy by coordinating a broad palette of PET felt hues, that range from neutral to bold, with a variety of finishes and optics available for the louver cells. Calm and subdued, energized and modern, or resoundingly bold, interiors are infused with color and optimal lighting to impart the desired atmosphere.

Independently controlled direct and indirect light sources provide further flexibility to create lighting scenes that transform how occupants experience the space.

**Neutral** - Classic White, Cinnamon

**Bold** - Blush, Seafoam

**BERRY**  
**SLATE**

**Bolder**

# HIGH-PERFORMANCE LIGHT SOURCES

A wide choice of output levels, Lambertian or batwing indirect distributions, and five louver cell beam spreads, from narrow flood to wide flood and louver mixing chamber, support a variety of applications. Color temperatures from 2700K to 4000K at CRI 80 or 90 are ideal for corporate offices, hospitality, retail, educational, recreational, or healthcare settings.

INDIRECT OPTICS 250-800 lm/ft

DIRECT LOUVERS 250-1000 lm/ft

Wide Flood

# ID+ TECHNOLOGY

Louver cells leverage the ID+ Technology used in the ID+ family of downlights and cylinders to deliver precise and powerful illumination with consistent light quality. This opens up new design possibilities when using within the same environment.

- **Visual comfort with deep 60° regress**
- **Diversity of louver finishes**
- **Broad range of beam spreads**

Mixing and matching PET felt colors and louver cell finishes results in stylish acoustic luminaires that also tailor how the light is perceived.

Berry + Matte Black

Blush + Clear Specular

Seafoam + Clear Diffuse

Hazelwood + Matte White

# A COORDINATED PRODUCT OFFERING

Seem 1 Acoustic Louver is part of a growing portfolio of acoustic luminaires and integrated acoustic ceiling solutions that help achieve acoustically sound, visually appealing, thus beautifully comfortable interior environments. A common PET felt color palette ensures flawless color coordination.

It also supplements a selection of luminaires with consistent and cohesive light quality that leverage the ID+ Technology, with matching light sources and options, including ID+ Downlights and Cylinders, and Seem 1 Louver, making them ideal companions to outfit the various areas of a space.

# SEEM<sup>®</sup> 1

The Seem 1 portfolio is a broad family of nominal 1.5" aperture linear luminaires that provide flexibility to impart a glowing linear elegance and deliver a range of illumination solutions to bring harmony to any interior space. Go beyond illumination with Seem 1 Acoustic luminaires and AirCore Bridge<sup>®</sup>, integrated luminaire and sound-absorbing baffle systems that leverage the narrow aperture and advanced light engine of Seem 1 while improving human comfort and mitigating reverberation issues in open spaces.
