FEATURES

Avenue® 6 integrates with TechZone™ Ceiling Systems for a clean, unobtrusive aesthetic.

1 and 2 lamp fluorescent T5/T5HO or T8 combined with (2) 50 watt MR16 modules.

Fluorescent shielding options include corrugated or solid regressed trim, flush lens or parabolic louver.

PERFORMANCE

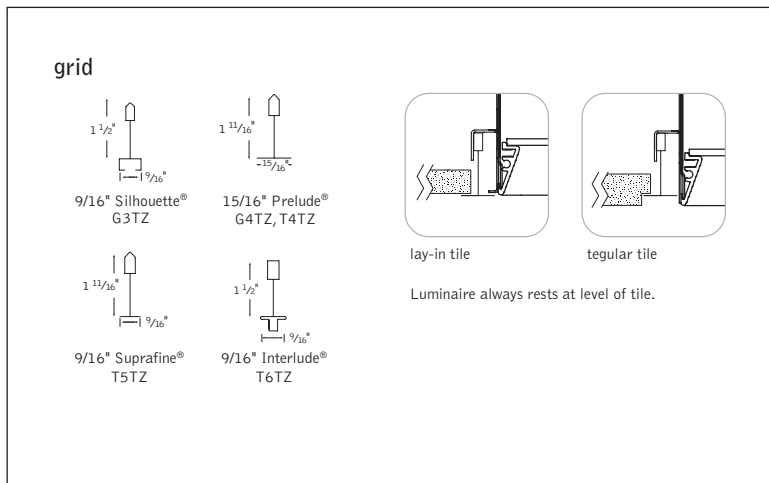

1-Lamp T5HO
67% Efficient
1392 cd @ 125°

PRODUCT OVERVIEW

Lumen Output: 1525-8862lm*
Wattage: 133-280W
Lamping: T5, T5HO, T8, MR16

Visit focalpointlights.com for complete photometric data.

MOUNTING INFORMATION

SPECIFICATIONS

Construction

One-piece 20 Ga. steel housing. Corrugated and solid regress trim constructed of 6063-T5 extruded aluminum finished in Matte Satin White. 20 Ga. steel, universal flange rail finished in Matte Satin White. Housing includes thermally protected (50W max), (T-rated) MR16 modules. Die-cast trim is keyed to housing during relamping via swing clear torsion springs. Torsion springs pull up tight to the ceiling and install in 90° increments. No visible fasteners within the trim. Mechanical light traps eliminate light leaks. Positional brackets supplied as standard. 4' unit weight: 18 lbs., 5' unit weight: 25 lbs.

Optic

22 Ga. steel reflectors finished in High Reflectance White powder coat. Acrylic lens diffuser .118" thick, frosted clear. Parabolic louver: .75"H x 1.5" frequency fabricated of low iridescent, semi-specular premium grade aluminum. Louver can be specified with matte white finish. MR16 optics provide 50° cutoff to the lamp and lamp image. Die-cast parabolic cone ensures glare free optics. Clear Specular "CS", Clear Diffuse "CD", Black Specular "BS", Black Baffle "BB" and White Baffle "WB" are painted finishes.

Adjustment Mechanism

Auto Memory for relamping, lamp returns to preset aiming position. Mechanism is stainless steel with, matte black finish, and holds lamp and lenses independently. Hot aiming with Phillips screwdriver allows for 363° rotation and 0-45° vertical tilt when Adjustable Accent "AA" is specified. Hand and trim rotate with the lamp so as not to block the beam of light. Mechanism pulls down from recessed housing for quick and easy relamping. Vertical angle and horizontal rotation indicators display positioning. Tempered soft focus lens supplied as standard. Lens tray can hold up to three accessories, up to 3/8" thick. Lenses remain undisturbed during relamping.

Electrical

Luminaires are individually wired for specified circuits. Thru-wiring not available. Electronic ballasts are thermally protected and have a Class "P" rating. Porcelain bi pin socket with #18 Teflon leads with keyed quick connection. Thermally protected, guards against over-heating and misuse of insulation. Transformers available in 120V or 277V electronic. Consult factory for dimming specifications and availability.

Labels

UL and cUL listed.

Finish

Polyester powder coat applied over a multi-stage pre-treatment.
