An expression of less is more

With Obscura, we set out to engineer a luminaire that would push the limits of designing with LEDs, that would exemplify “less is more.” Simplicity, efficacy, and beauty were our guiding principles. Its broad batwing distribution with direct task lighting and soft indirect illumination supports the design of open, airy, and minimalistic spaces.

An expression of less is more

With Obscura™, we set out to engineer a luminaire that would push the limits of designing with LEDs, that would exemplify “less is more”. Simplicity, efficacy, and beauty were our guiding principles. Its broad batwing distribution with direct task lighting and soft indirect illumination supports the design of open, airy, and minimalistic spaces.
Balancing beauty and functionality

A luminaire with a distinct and streamlined form that supports function; two thin blades of light lightdate the space with powerful yet soft illumination. Coupling the flexibility to customize with its minimalist design, Obscura delivers a functional architectural statement.
