DO NOT OVERTIGHTEN

Luminaires must be installed by a qualified electrician (check with local and national codes for proper installation). To prevent electrical shock, disconnect electrical supply before installation or servicing.
Luminaires must be installed by a qualified electrician (check with local and national codes for proper installation).

To prevent electrical shock, disconnect electrical supply before installation or servicing.

Attention before beginning drywall installation consult guide on page 1 to ensure the backer flange is set at the correct depth for the drywall.
Luminaires must be installed by a qualified electrician (check with local and national codes for proper installation). To prevent electrical shock, disconnect electrical supply before installation or servicing.

2" x 6" Framing Required on Both Sides of Housing

Using the backer flange placement guide from Page 1 determine the proper placement of the backer flange for your drywall thickness.

If backer flanges were pre-installed skip to step 4.

Use imprint on 0.5" pop-down lenses to ensure all lenses are installed facing the same direction.
Luminaires must be installed by a qualified electrician (check with local and national codes for proper installation).

To prevent electrical shock, disconnect electrical supply before installation or servicing.

AVOID ALL CONTACT WITH LED SURFACE, LEDS ARE EASILY DAMAGED!
