DEFAULT LOCATIONS

- By default, EM/EC are located at the end (last section) of a run when one EM/EC location is specified, and at the start and end when two locations are specified.
- EM/EC illuminate entire sections from 4’ to 8’ in length.
- Feed location is at start of run. All EC’s are fed individually at the end of each fixture segment.

CUSTOM LENGTHS

- If partial illumination of emergency section is required, indicate quantity in ordering string and partial illumination in Order Notes. Drawing required.
- Longer lead times may apply.

*Recessed and suspended only. Does not include direct/indirect, pop-down lens or asymmetric options.

Standard run configurations, consult factory for custom configurations.
