We are changing the game. Introducing ID+, the next generation of Focal Point’s Intelligent Downlight and Cylinder offering. ID+ brings it all together: size and shape, color and intensity, beauty and performance, ease and efficiency. It’s the complete package, bringing it all to light with downlights and cylinders. Though not always obvious through small apertures, big changes are happening above and below the ceiling. Get excited. Be inspired. Take a look.
ID+ The Complete Downlight and Cylinder Solution

Offering aperture sizes from 2.5" to 8", round or square, targeted lumen packages, and numerous distributions, ID+ is the answer to all of your downlighting needs.

### Finish Options

#### DOWNLIGHT TRIM AND REFLECTOR FINISHES

- Black Die-cast
- Black Painted
- Bronze
- Clear Diffuse
- Titanium Silver
- Warm Diffuse
- White Die-cast
- White Painted
- White Non-Glow
- Black Non-Glow
- White Glowing
- Custom RAL color

#### CYLINDER EXTERIOR FINISHES & REVEL OPTIONS

- White
- Black
- Palladium Silver
- Custom RAL Color

The Color and Flexibility You Deserve

With ChromaSure®, the color of the light from any of our ID+ downlights is the same ensuring a cohesive look throughout a space. We utilize a consistent phosphor mix resulting in a 2-step MacAdam ellipse across the entire product portfolio.

Standardization and customization come together with our new Right Light™ feature. Right Light provides a broad range of standard delivered lumen outputs that stay consistent as technology upgrades occur.

In addition, tunable drivers allow for custom wattage and lumen outputs to be specified with the standard range.
**Low Brightness**

Brightness control is a key design feature of ID+ downlights and cylinders. The low brightness design of the downlights and cylinders is finished with a diffuse 50° cut-off reflector. The gently grazed reflector surface contributes to a comfortable and quiet presence in the ceiling that seamlessly blends into a space.

**Driver Options**

LEDs have long life and efficiency benefits unlike any other light source. However, to be truly effective, the right control system is needed. ID+ downlights and cylinders are available with 0-10V, DALI, DMX*, and Lutron, to meet different design requirements and energy codes.

*Not available for cylinders*
All the **beauty and feel** of halogen, with all the **longevity and efficiency** of LED.

**ID+ 2.5”**

**FIELD CHANGEABLE BEAMSPREAD**
Removable optics allow for easy swapping of beam spreads in the field from 15° to 60°.

**PRECISION ADJUSTMENT**
A proprietary mechanism makes aiming and alignment of the luminaire precise and easy. 362° rotation and 0° to 40° vertical tilt allows design flexibility, while an integrated light shield drops down to eliminate light spill into the plenum.

2.5” **FAMILY**

- Adjustable Accent
- Downlight
- Wall Wash
- Decorative*
**ID+ 3.5" Adjustable**

**SHALLOW HOUSING**  
Designed for shallow plenum applications, the housing provides ease of installation in the most restricted spaces with a maximum height of 3.12" at full tilt (35°).

**FIELD CHANGEABLE OPTICS**  
A twist & lock mechanism allows to easily change the beam spread optics post-installation; spot, narrow flood, flood and linear spread are field changeable.

**TOOL-LESS ADJUSTABILITY**  
Allows for ease of installation and accommodates design changes in the field.

**360° ROTATION**  
Precise aiming and orientation is achieved by a simple rotation of the light module.

**0° - 35° TILT**  
A simple adjustment handle is used to position and aim the beam. Degree markers offer a visual confirmation for consistency throughout a space.

**PUNCH OF POWER**  
The superior optical design offers crisp light distribution. Packed with power, the ID+ 3.5" Adjustable Accent has a center beam candlepower (CBCP) up to 12,360 candelas, the highest in the industry for its petite size.
A small luminaire offering performance and flexibility, for shallow plenum applications.

SHALLOW UNIVERSAL HOUSING A universal housing design allows easy interchangeability between downlight and wall wash. And a shallow depth allows easy installation in the most restricted spaces.

DIE-CAST TRIM The seamless look of a square die-cast trim is offered in white and black as standards; custom colors can be special-ordered.

TWIST & LOCK The mechanical connection between the trim and the source prevents light leakage and makes swapping the trim on installed fixtures a breeze.
ID+ 3.5"

BRIGHTNESS CONTROL Three reflector trim options, 50°, 60°, and 75° cut-off provide optimal visual comfort and deliver various beam spreads while fitting nicely in the shallowest of plenums, to meet the demands of each application.

SOURCE & APERTURE MATCHED By pairing the shape of the light source with that of the aperture, and covering the LED module with a glass lens, we ensure that the luminaires provide an appealing aesthetic, lights on or off.

A practical and elegant solution for each application.

3.5" FAMILY

DOWNLIGHT

WALL WASH
ID+ 3.5" & 4.5" Cylinders

Designed to unify a space with matching aperture sizes.

EXTERIOR FINISHES Create a seamless look with three standard finish options: White, Black, or Palladium Silver, or customize the luminaire using any RAL color value.
**ID+ 3.5" & 4.5" Cylinders**

**Simple yet sophisticated, adding a refined aesthetic to commercial spaces.**

**VERSATILE DESIGN** Allows for the selection of glowing or non-glowing reveal for a decorative or discreet aesthetic.

**FIELD CHANGEABLE REFLECTOR & OPTICS**
The twist & lock reflector and beam spread optic allows for easy maintenance and changeability of beam spreads: spot, narrow flood, flood, wide flood, and super wide flood in the field.

**CONTROLLED ILLUMINATION** Two cone options help meet the demands of varying applications: a 50° cut-off promotes visual comfort while an 80° cut-off minimizes scalloping on walls.

**KNIFE EDGE** Provides a refined aesthetic and unified look with matching aperture sizes to the trimless downlights.
ID+ 4.5" Adjustable

Using less energy to deliver the highest CBCP in the industry and a knock-out punch to any space.

**SHADOW LIMITING OPTICS** The single chip design eliminates multiple shadows without compromising on light intensity.

**FIELD CHANGEABLE OPTICS** The snap and fit proprietary optic allows for easy interchangeability between beamspreads ranging from 10° to 45° after installation of the luminaire.

**AIMING & ALIGNMENT** With its easy to locate adjustment handle, clearly defined degree markers and intuitive lock/unlock location, the 4.5" Adjustable makes aiming and alignment easy.
HOMOGENEOUS SOURCE
Pairing the shape of the source with the aperture, the standard white glass lens creates a uniform appearance when lit and a clean aesthetic when not in use.

ID+ 4.5" & 6.0"

Thoughtfully engineered to provide the perfect combination of performance and visual comfort.

UNIVERSAL HOUSING
A universal housing design allows easy interchangeability between downlight and wall wash.

CEILING ADAPTABILITY
A unique slide-on design ensures mechanical connection between trim and source eliminating unsightly gaps and light leak above the ceiling. Accommodates ceiling thicknesses from 0.5" to 2.5".

HOMOGENEOUS SOURCE

DOWNLIGHT

WALL WASH
4.5" TRIMLESS
Available in round and square apertures, the trimless 4.5" downlight disappears seamlessly into the ceiling.

4.5" FAMILY

4.5" DECORATIVE LENS OPTIONS
Create dimension and impart a glowing elegance in any space with the decorative dropped lens options available with 4.5" square downlights.

DECORATIVE DROP LENS
FROSTED LENS

DELIVERING CLEAN LINES AND BEAUTY TO INSPIRE YOUR SPACE.

FROSTED LENS
DECORATIVE DROP LENS
Embrace the idea that you can have low maintenance, flexibility, and energy savings without sacrificing visual comfort.

**EFFICIENTLY FLEXIBLE** Field changeable optical filters shape the light into smooth beamspreads from 30°–65°. The filter creates a single homogeneous light source and eliminates distracting multi-source shadows.

**STABLE & SILENT** A passive cooling system enables longevity without the need for a mechanical cooling device or fan even in environments with ambient temperatures up to 45°C.
